We are Mathematicians…

Calculation Policy 2026-27

Milton On Stour CE School

Progression of skills – Addition

Year Group	Skills
Nursery	• Subitise to 3 • Count how many • Make numbers to 5 • Add 1 more (through songs and rhymes)
Reception	• Conceptually subitise to 5 • Recall number bonds up to 5 • 1 more • Notice the composition of numbers within 10, having a deeper understanding of each number • Combine 2 groups • Add more
Year 1	• Add together • Add more • Bonds within 10 • Related facts within 20 • Missing numbers

Progression of skills – Addition

Year Group	Skills
Year 2	• Add 1s to any number • Add three 1-digit numbers • Add across 10 • Add multiples of 10 • Add 10s to any number • Add two 2-digit numbers (not across a ten) • Add two 2-digit numbers (across a ten) • Missing numbers
Year 3	• Add 1s, 10s and 100s to a 3-digit number • Add two numbers (no exchange) • Add two numbers across a 10 or 100 • Complements to 100 • Add fractions with the same denominator within 1 whole • Calculate the duration of events

Progression of skills – Addition

Year Group	Skills
Year 4	• Add 1s, 10s and 100s to a 4-digit number • Add up to 4-digit numbers • Add decimal numbers in the context of money • Add fractions and mixed numbers with the same denominator beyond 1 whole
Year 5	• Add using mental strategies • Add whole numbers with more than 4 digits • Add decimals with up to 2 decimal places • Complements to 1 • Add fractions with denominators that are a multiple of one another
Year 6	• Add integers up to 10 million • Add decimals with up to 3 decimal places • Order of operations • Negative numbers • Add fractions

Addition	
Reception	• **Have a deep understanding of numbers to 10, including the composition of each number** • **Subitise (recognise without counting) up to 5** • **Automatically recall number bonds up to 5 and some numbers bond to 10, including double facts.**
Progression of Skills	**Key Representations**
Subitise to 5 Notice the part that make up the whole	What do you see? How do you see it?  1 more Continue to link stories, songs and rhymes	1 more than…..is……..  Notice the composition of numbers within 10. Link to stories, songs and rhymes.	How many…..? How many altogether? How many ways can you make?  
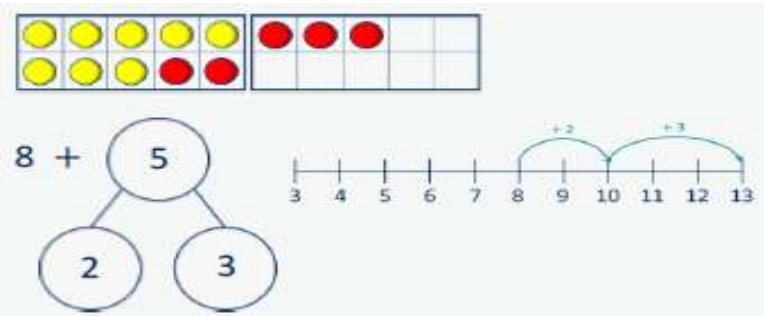
Progression of Skills	Key Representations	
Combine 2 groups 2 groups are combined to make the total	There are…… There are……altogether …… and ……make…… 	
Add more A quantity is increased	First… Then…. Now…. 	I have…. I add….more Now I have….. 
Addition			
Year 1	• **Read, write and interpret mathematical statements involving addition and equal signs** • **Represent and use number bonds within 20** • **Add 1 – digit and 2-digit numbers to 20, including zero** • **Solve one-step problems that involve addition using concrete objects and pictorial representations, and missing number problems.**		
Progression of Skills	**Key Representations**		
Add together 2 quantities are combined to find the total	There are… There are… There are…altogether 	…is a part. …is a part. …is the whole. 	…plus…is equal to … …is equal to … +… $4 + 2 = 6$ $2 + 4 = 6$ $6 = 4 + 2$ $6 = 2 + 4$
Add more A quantity is increased	First…. Then… Now… 	I start at…. I jump on….I land on… 	…plus…is equal to …is equal to…+… $4 + 2 = 6$ $2 + 4 = 6$ $6 = 4 + 2$ $6 = 2 + 4$

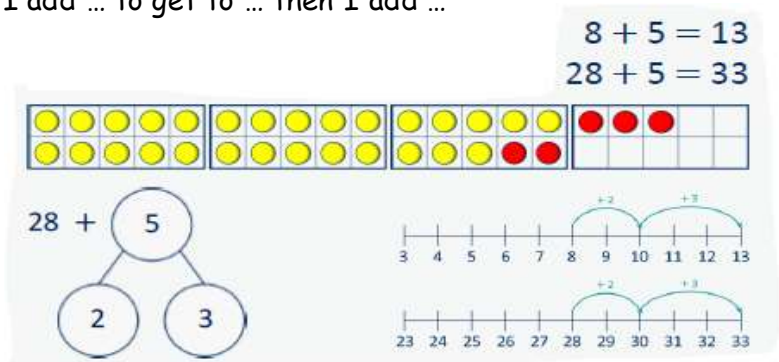
Bonds within 10 Include bonds for each number within 10	…is made of….and…. …and…make…. 	…can be partitioned into…and… 	…plus…is equal to… $6+0=6$ $5+1=6$ $4+2=6$ $3+3=6$ $2+4=6$ $1+5=6$ $0+6=6$
Related facts within 20 Make links to known facts.	I know that…and…=… So…and…=… 	…more than…is… So…more than…is… 	What patterns do you notice? $5+2=7$ $15+2=17$ $7=5+2$ $17=15+2$
Missing Numbers Make links to known facts.	How many more do you need to make…? 	If … is the whole and … is a part, the other part must be… 	… plus … is equal to … $2+\square=6$ $6=2+\square$ 

<table>
<tr><td>Year 2</td><td colspan="3">• Recall and use addition facts to 20 fluently, and derive and use related facts up to 100
• Add numbers using concrete objects, pictorial representations, and mentally,
• including:
• a two-digit number and 1s, a two-digit number and 10s, 2 two-digit numbers, adding 3 one-digit numbers
• Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.</td></tr>
<tr><td>Progression of Skills</td><td colspan="3">Key Representations</td></tr>
<tr><td>Add ones to any number
(related facts)
Make links to known facts.</td><td>I know that … and … = …
so … and … = …
</td><td>… more than … is …
So…more than….is…
</td><td>What do you notice?
Can you notice the patterns?
$5 + 2 = 7$
$15 + 2 = 17$
$25 + 2 = 27…$</td></tr>
<tr><td>Add three 1-digit numbers
A quantity is increased</td><td>… and … are a bond to 10
10 + … = …
</td><td>Double … + … = …
</td><td>What do you notice?
Which addition is the
easiest to calculate?
$8 + 9 + 1 =$
$8 + 1 + 9 =$
$9 + 1 + 8 =$</td></tr>
</table>

<table>
<tr>
<td>Add across 10

Partition the number being

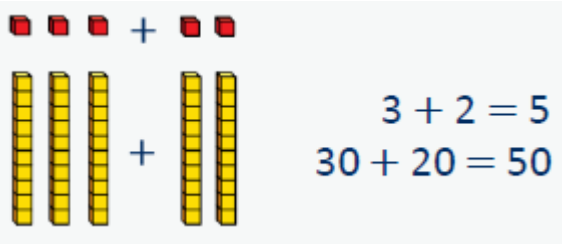
added to make a full ten.</td>
<td>… can be partitioned into … and …


</td>
<td>I add … to get to … then I add …


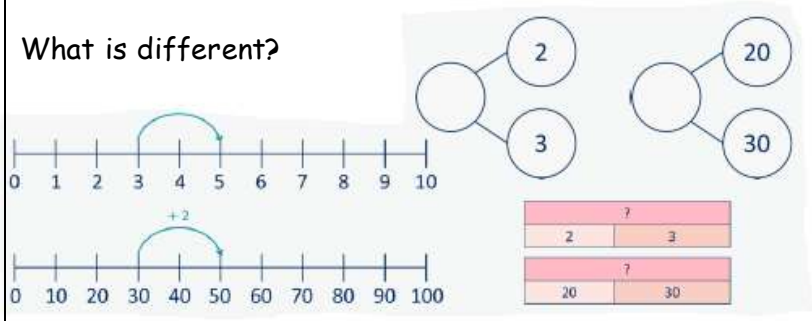
</td>
</tr>
<tr>
<td>Add multiples of 10

Make links to known facts

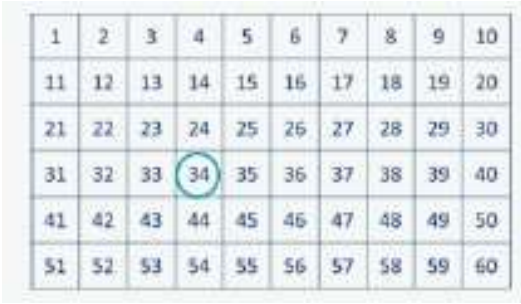
within ten.</td>
<td>… ones + … ones = … ones

so … tens + … tens = … tens


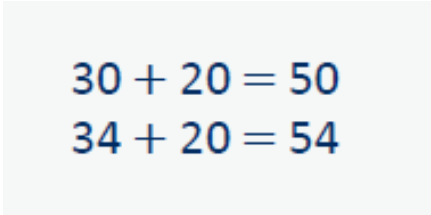
</td>
<td>What is the same?

What is different?


</td>
</tr>
<tr>
<td>Add 10 to any numbers</td>
<td>… tens + … tens = … tens

… tens and … ones = …
</td>
<td>To add … I need to add 10… times.


</td>
<td>I know that … and … = …

so … and … = …


</td>
</tr>
</table>

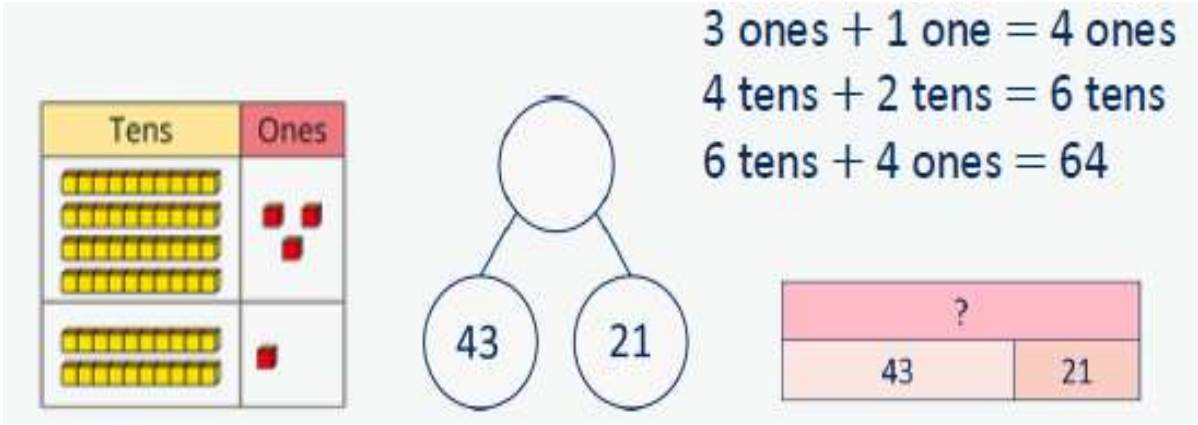
<table>
<tr>
<td>Add 2-digit numbers (not crossing 10)

Lining up ones and tens in

columns will support with

later written methods.</td>
<td>… ones + … ones = … ones

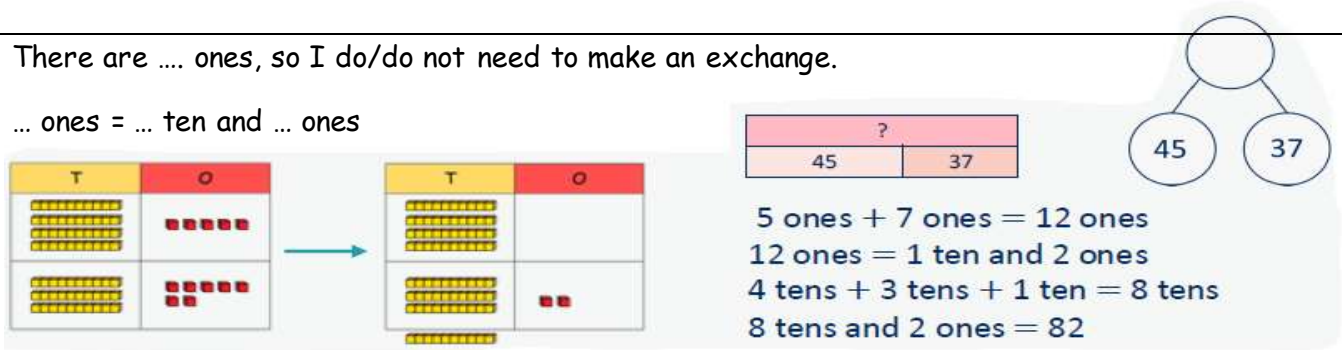
… tens + … tens = … tens



</td>
</tr>
<tr>
<td>Add 2-digit numbers (across a ten)

Begin to exchange 10 ones for 1 ten.</td>
<td>There are …. ones, so I do/do not need to make an exchange.

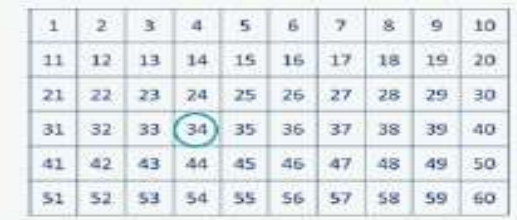
… ones = … ten and … ones



</td>
</tr>
<tr>
<td>Add 10 to any numbers</td>
<td>… tens + … tens = … tens

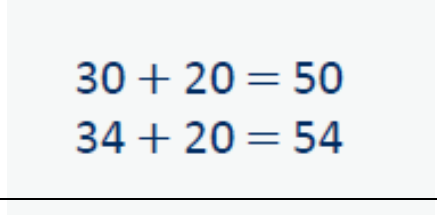
… tens and … ones = …

</td>
<td>To add … I need to add 10… times.



</td>
<td>I know that … and … = …

so … and … = …



</td>

Progression of skills – Subtraction

Year Group	Skills
Nursery	• Subitise to 3 • Count how many • Make numbers to 5 • Take 1 away (through songs and rhymes)
Reception	• Conceptually subitise to 5 • Fewer and less than • Notice the composition of numbers within 10 • Partition • Take away
Year 1	• Conceptually subitise to 5 • 1 less • Notice the composition of numbers within 10 • Partition • Take away
Year 2	• Subtract 1s from any number (related facts) • Subtract across a 10 • Subtract multiples of 10 • Subtract 10s from any number • Subtract two 2-digit numbers (not across a ten) • Subtract two 2-digit numbers (across a ten)

Year Group	Skills
Year 3	• Subtract 1s, 10s and 100s from a 3-digit number • Subtract two numbers (no exchange) • Subtract two numbers across a 10 or 100 • Complements to 100 • Subtract fractions with the same denominator within 1 whole
Year 4	• Subtract 1s, 10s, 100s and 1,000s from a 4-digit number • Subtract up to two 4-digit numbers • Subtract decimal numbers in the context of money • Subtract fractions and mixed numbers with the same denominator
Year 5	• Subtract whole numbers with more than 4 digits • Subtract using mental strategies • Subtract decimals with up to 2 decimal places • Complements to 1 • Subtract fractions with denominators that are a multiple of one another
Year 6	• Subtract integers up to 10 million • Subtract decimals with up to 3 decimal places • Order of operations • Negative numbers • Subtract fractions

Subtraction	
Reception	• **Have a deep understanding of number to 10, including the composition of each number.** • **Subitise (recognise quantities without counting) up to 5** • **Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (and some subtraction facts) and some number bonds to 10, including double facts.**
Progression of Skills	**Key Representations**
Conceptually subitise to 5 Notice the parts that make up the whole.	What do you see? How do you see it?  1 less Continue to link to stories, songs and rhymes.	1 less than…..is…….. Notice the composition of numbers within 10 Link to stories, songs and rhymes.	How many…? How many…? How many altogether? 
	How many ways can you make…? 
Partition Using objects, explore different ways to partition a number into 2 or more parts.	There are … altogether. I can see … here and … there. 	… and … make … Take away A quantity is reduced.	First… Then… Now… 	I have … I take … away Now I have … 
Subtraction			
Year 1	• **Read, write and interpret mathematical statements involving subtraction (–) and equals (=) signs.** • **Represent and use number bonds and related subtraction facts within 20** • **Subtract one-digit and two-digit numbers to 20, including zero.** • **Solve one-step problems that involve subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = ____ – 9**		
Progression of Skills	**Key Representations**		
Find a part Link to number bonds and known facts. E.g. 2 + 4 = 6	There are … in total. How many are not …? 	… is the whole. … is a part. … is a part. 	… subtract … is equal to … … is equal to … – … $6-2=4$ $6-4=2$ $4=6-2$ $2=6-4$
Take away A quantity is decreased.	First… Then… Now… 	I start at …I jump back … I land on … 	… minus … is equal to … … is equal to … – … $6-2=4$ $6-4=2$ $4=6-2$ $2=6-4$

Bonds within 10 Focus on subtraction facts. Encourage children to notice patterns.	… is made of … and … … and … make … 	… can be partitioned into … and … 	… minus … is equal to … $6 - 0 = 6$ $6 - 1 = 5$ $6 - 2 = 4$ $6 - 3 = 3$ $6 - 4 = 2$ $6 - 5 = 1$ $6 - 6 = 0$
Related facts within 20 Make links to known facts	I know that…minus… = So… minus…. = …….. 	… less than … is … so … less than … is … 	What patterns do you notice? $8 - 3 = 5$ $18 - 3 = 15$ $5 = 8 - 3$ $15 = 18 - 3$
Missing Numbers Make links to known facts	How many do you need to subtract to make…? 	If… is the whole and … is a part, the other part must be… 	…minus…is equal to…. $6 - \square = 2$ $2 = 6 - \square$ 

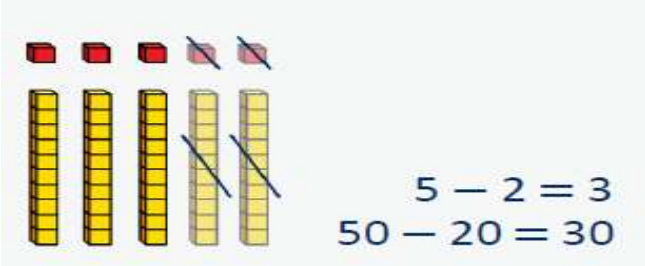
<table>
<tr><td colspan="4">Subtraction</td></tr>
<tr><td>Year 2</td><td colspan="3">• Recall and use subtraction facts to 20 fluently, and derive and use related facts up to 100
• Subtract numbers using concrete objects, pictorial representations, and mentally, including: a two-digit number and 1s , a two-digit number and 10s , 2 two-digit numbers
• Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.</td></tr>
<tr><td>Progression of Skills</td><td colspan="3">Key Representations</td></tr>
<tr><td>Subtract ones from any number
Make links to known facts</td><td>I know that…minus… = ….
So, …minus…=…
</td><td>…less than…is
So…less than…is…
</td><td>What do you notice?
Can you continue the pattern?
$8-3=5$
$18-3=15$
$28-3=25…$</td></tr>
<tr><td>Subtract across a 10
Partition the number being subtracted to bridge through a ten.</td><td colspan="2">… can be partitioned into … and …
</td><td>Make links with related facts.
</td></tr>
</table>

Subtract multiples of 10

Make links to known facts within ten.

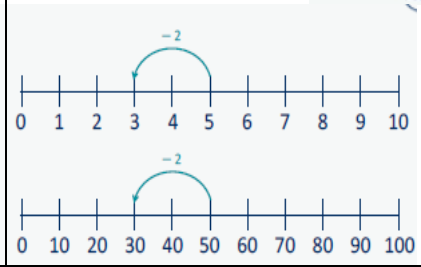
… ones – … ones = … ones

so … tens – … tens = … tens



What is the same?

What is different?

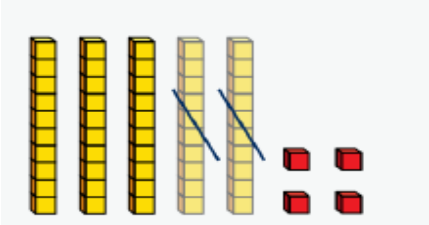


Subtract 10s from any number

Make links to known facts.

… tens – … tens = … tens

…tens and… ones = ….



To subtract … I need to

subtract 10 … times.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60

I know that … minus … = …

so … minus … = …

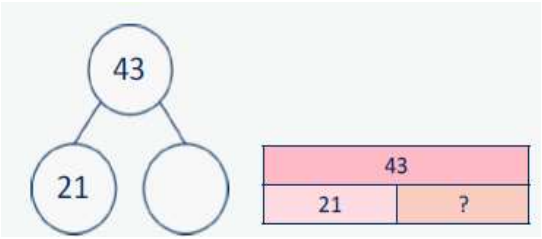
50 − 20 = 30

54 − 20 = 34

Subtract two 2-digit numbers
(not across a ten)

… ones – … ones = … ones

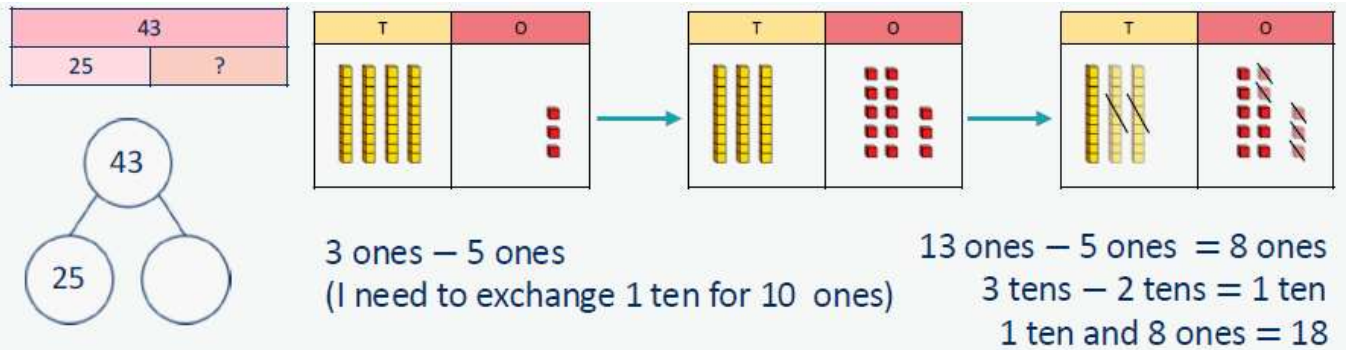
… tens – … tens = … tens

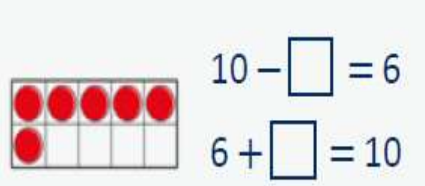


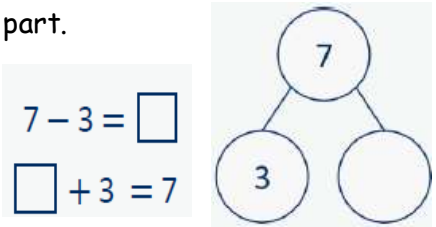
3 ones − 1 one = 2 ones

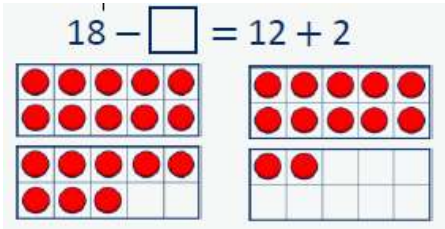
4 tens − 2 tens = 2 tens

2 tens and 2 ones = 22

<table>
<tr>
<td>Subtract two 2-digit numbers
(across a ten)
Begin to exchange 1 ten for 10 ones.</td>
<td colspan="3">I need to make an exchange because I do not have enough ones to subtract … ones.


</td>
</tr>
<tr>
<td>Missing numbers
Solve missing number problems and use the inverse to check.</td>
<td>How many do you need to subtract to make …?


</td>
<td>If … is a whole and … is a part, then … is the other part.


</td>
<td>… can be partitioned into … and …


</td>
</tr>
</table>

Subtraction	
Year 3	• **Subtract numbers mentally, including: a three-digit number and ones, a three-digit number and tens, a three-digit number and hundreds.** • **Subtract numbers with up to three digits, using formal written methods.** • **Subtract fractions with the same denominator within 1 whole.**
Progression of Skills	**Key Representations**
Subtract 1s, 10s and 100s **from a 3-digit number** Emphasis on mental strategies including number bonds and related facts.	The ones/tens/hundreds column will decrease by.  What patterns do you notice? Subtract two numbers (no exchange)		

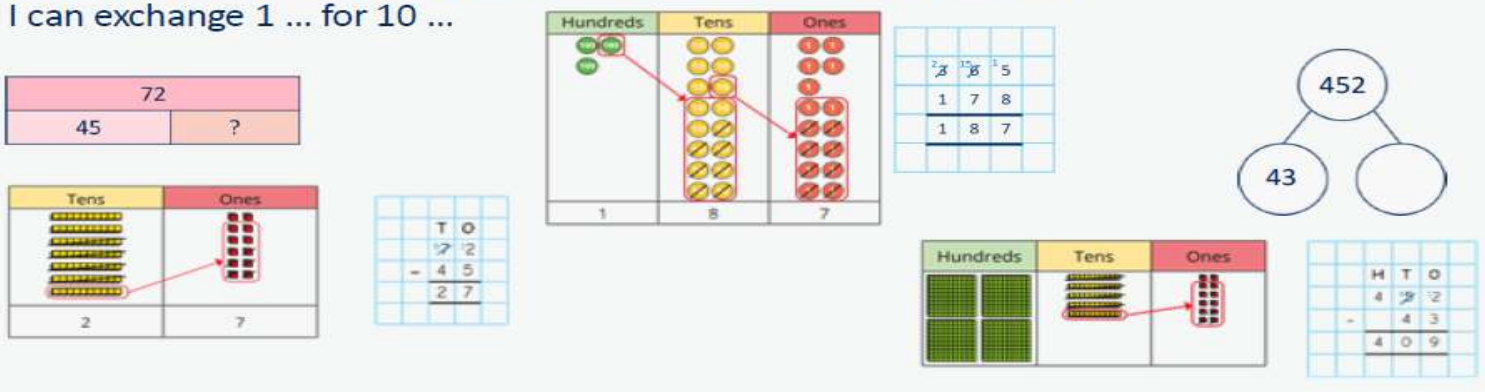
<table>
<tr>
<td>Subtract two numbers across a 10 or 100
Formal written method involving up to 2 exchanges including 3-digit subtract 2-digit numbers.</td>
<td colspan="2">I need to subtract … ones. I do/do not need to make an exchange.
I need to subtract … tens. I do/do not need to make an exchange.
I can exchange 1 … for 10 …


</td>
</tr>

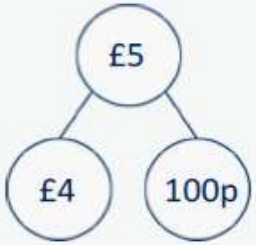
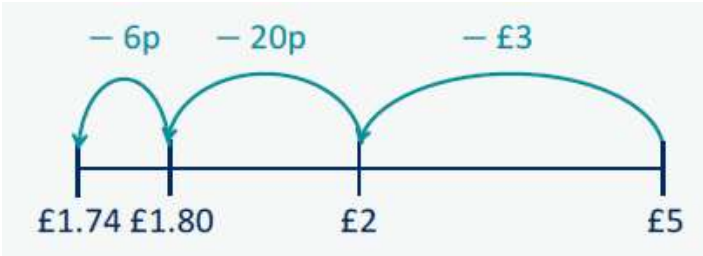
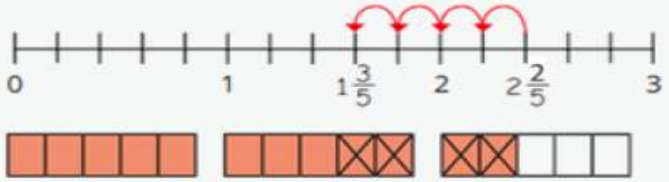
<td>Subtract decimal numbers in the context of money
Emphasis here is on partitioning and use of number lines rather than formal written calculations.</td>
<td>I can partition £… into £… and 100p
£… – £… = £… 100p – …p = …p
£5 – £3.26
£4 – £3 = £1
100p – 26p = 74p
£5 - £3.26 = £1.74


</td>
<td>£3.26 can be partitioned into £3 + 20p + 6p


</td>
</tr>
<tr>
<td>Subtract fractions and mixed numbers with the same denominator
Include subtracting fractions from wholes.</td>
<td colspan="2">When subtracting fractions with the same denominator,
I only subtract the numerator.
… tenths – … tenths = … tenths

 $\frac{16}{10} - \frac{5}{10}$
 $\frac{16}{10} - \frac{9}{10}$


</td>
</tr>
</table>

Subtraction	
Year 5	• Subtract whole numbers with more than 4 digits. • Subtract numbers mentally with increasingly large numbers. • Subtract decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 • Subtract fractions with the same denominator, and denominators that are multiples of the same number.
Progression of Skills	**Key Representations**
Subtract whole numbers with more than 4 digits Encourage children to estimate and use inverse operations to check answers.	I can exchange 1 … for 10 … Subtract using mental strategies Subtract 1s, 10s, 100s etc from any number.		To subtract …, I can subtract … then add … 
Subtract decimals with up to 2 decimal places Progress from the same number of decimal places to a different number of decimal places and from no exchange to exchange.	Complements to 1 Encourage children to make links with bonds to 10 and complements to 100 and 1,000 when finding a missing part or subtracting from 1	Subtract fractions with denominators that are a multiples Convert fractions to the same denominator. Progress from - fractions within 1 whole to subtracting from a mixed number.	The denominator has been multiplied by … , so the numerator needs to be multiplied by… for the fractions to be equivalent. 
Subtraction	
Year 6	• **Subtract larger numbers, using the formal written methods of columnar subtraction.** • **Use their knowledge of the order of operations to carry out calculations involving the 4 operations.** • **Calculate intervals across zero.** • **Subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.**
Progression of Skills	**Key Representations**
Subtract integers up to 10 million Encourage children to estimate and use inverse operations to check answers to calculations.	Subtract decimals with up to 3 decimal places Progress from the same number of decimal places and whole number places to a different number of decimals and whole number places.	I do/do not need to make an exchange because ... 
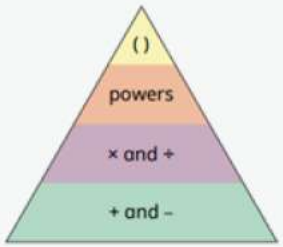
Order of operations

Children learn the order of priority for operations in a calculation. Calculations in brackets should be done first. Multiplication and division should be performed before addition and subtraction.

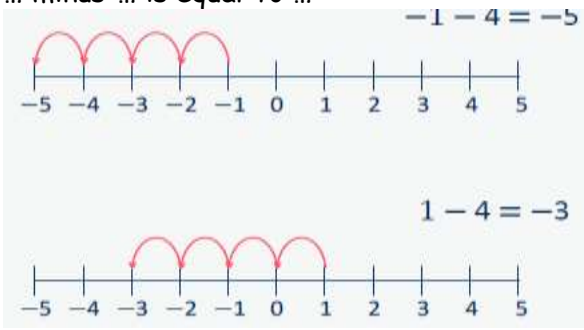
... has greater priority than … , so the first part of the calculation I need to do is …

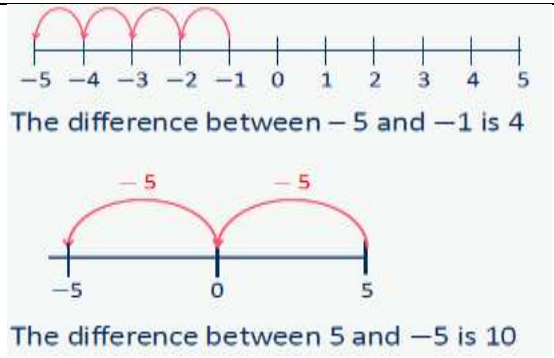


Negative numbers

Children subtract from positive and negative numbers and calculate intervals across 0

… minus … is equal to …

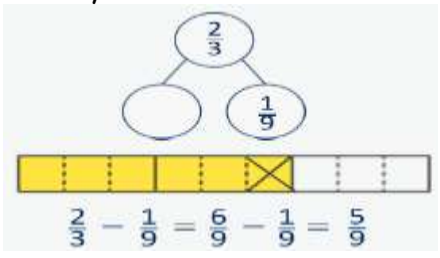




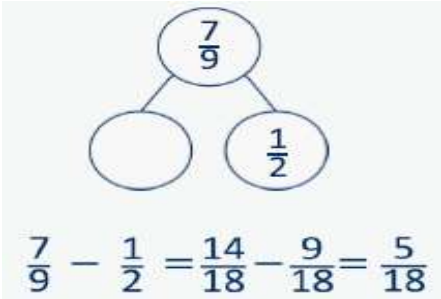
Subtract fractions

Convert fractions to the same denominator before subtracting. Progress from fractions where one denominator is a multiple of the other, to any fractions and then subtracting from a mixed number.

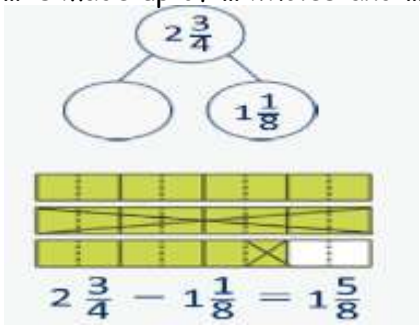
The denominator has been x by…, so the numerator needs to be x by…



The lowest common multiple of … and … is …



… is made up of … wholes and …



Progression of skills – Multiplication

Year Group	Skills
Nursery	• Continue with counting and subitising skills as a foundation for later work on equal groups. (see addition and subtraction sections)
Reception	• Double to 10 • Make equal groups
Year 1	• Count in 2s, 5s and 10s • Add equal groups • Make arrays • Make doubles
Year 2	• Link repeated addition and multiplication • Use arrays • Double • The 2 times-table • The 10 times-table • The 5 times-table • Missing numbers
Year 3	• The 3 times-table • The 4 times-table • The 8 times-table • Related facts • Multiply a 2-digit number by a 1-digit number - no exchange

	• Multiply a 2-digit number by a 1-digit number - with exchange • Scaling • Correspondence problems
Year 4	• The 3 times-table • The 4 times-table • The 8 times-table • Related facts • Multiply a 2-digit number by a 1-digit number - no exchange • Multiply a 2-digit number by a 1-digit number - with exchange • Scaling • Correspondence problems
Year 5	• Multiples and factors • Square and cube numbers • Multiply numbers up to 4 digits by a 1-digit number • Multiply numbers up to 4 digits by a 2-digit number • Multiply by 10, 100 and 1,000 • Mental strategies • Multiply fractions by a whole number • Multiply mixed numbers by a whole number • Find the whole
Year 6	• • Multiples and factors • Square and cube numbers

	• Multiply numbers up to 4 digits by a 1-digit number • Multiply numbers up to 4 digits by a 2-digit number • Multiply by 10, 100 and 1,000 • Mental strategies • Multiply fractions by a whole number • Multiply mixed numbers by a whole number • Find the whole.

Multiplication	
Reception	• Have a deep understanding of number to 10, including the composition of each number. • Subitise (recognise quantities without counting) up to 5 • Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts. • Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.
Progression of Skills	**Key Representations**
Understanding doubling Recognising that doubling means adding the same number again (e.g. double 3 is 6).	What do you see? How do you see it? Double…is… …is double… 
Make equal groups Provide opportunities to make equal groups. Encourage children to check that each group has the same amount.	There are … groups of … There are … altogether. 
Multiplication

Year 1	• **Count in multiples of twos, fives and tens.** • **Solve one-step problems involving multiplication, using concrete objects, pictorial representations and arrays with the support of the teacher.**

Progression of Skills	**Key Representations**		
Count in 2s, 5s and 10s Begin by counting objects that naturally come in 2s, 5s and 10s, for example pairs of socks or fingers.	There are … equal groups of … There are … altogether. 	Continue to colour in …s What do you notice?  1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31 32 33 34 35 36 37 38 39 40 41 42 43 44 45 46 47 48 49 50	Complete the number track/number line by counting in …s.  5 10 15 20 0 10 20 30 40
Add equal groups (repeated addition) Children should be able to write a repeated addition to represent equal groups and to draw pictures or use objects to represent a repeated addition.	There are … groups of … There are … altogether.  $10 + 10 + 10 = 30$ $5 + 5 + 5 + 5 = 20$	What is the same? What is different? $2 + 2 + 2 =$ $5 + 5 + 5 =$ $10 + 10 + 10 =$ Use objects or a drawing to represent the equal groups and find how many in total.	

Make arrays Children use their knowledge of adding equal groups to arrange objects in columns and rows.	There are … rows of … There are … altogether. Make doubles Children understand that doubles are two equal groups. Children may begin to explore doubles beyond 20 using base 10	Double … is … … + … = … … + … = … 
Multiplication	
Year 2	• **Recall and use multiplication facts for the 2, 5 and 10 multiplication tables.** • **Calculate mathematical statements for multiplication within the multiplication tables and write them using the multiplication (×) and equals (=) signs.** • **Show that multiplication of two numbers can be done in any order (commutative).**
Progression of Skills	**Key Representations**
Link repeated addition and multiplication Encourage children to make the link between repeated addition and multiplication.	There are … equal groups with … in each group. There are … altogether. Use arrays Encourage children to see that multiplication is commutative.	There are … rows with … in each row. There are … columns with … in each column. 
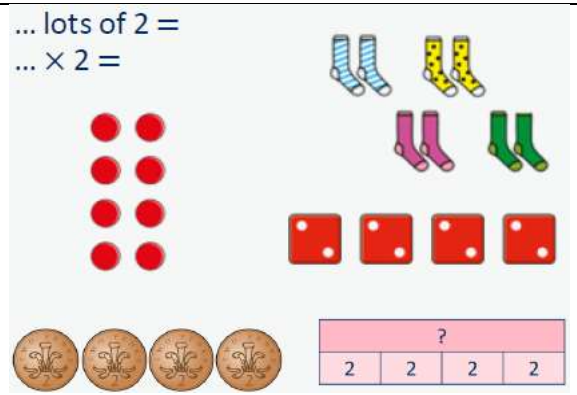
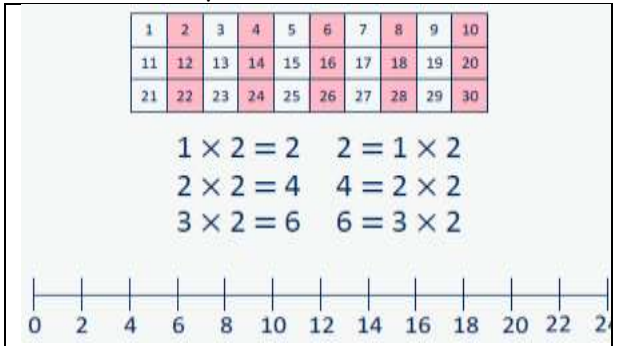
	I can see … × … and … ×… Double Encourage children to make links with related facts.	Double … is … 
	Double … is … so double … is … 
The 2 times-table

Encourage daily counting in multiples both forwards and back. Notice that all multiples of 2 are even numbers.



... times 2 is equal to …



The 10 times-table Encourage daily counting in multiples both forwards and back. Notice the pattern in the numbers.		The 5 times-table Encourage daily counting in multiples both forwards and back. Notice the pattern in the numbers.		
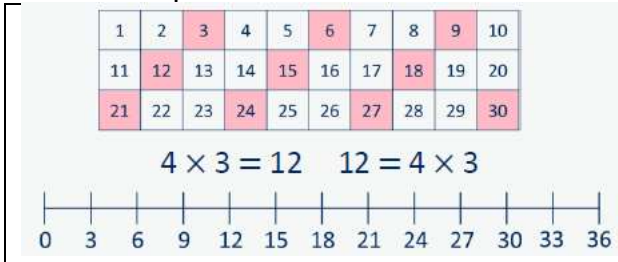
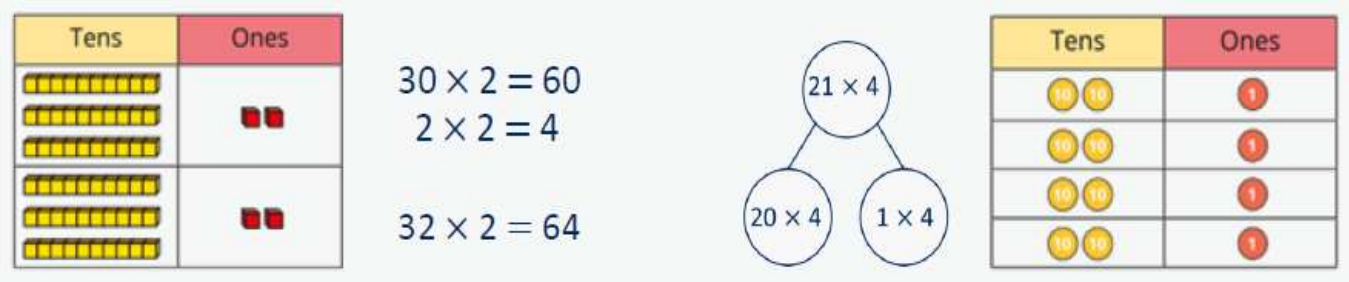
Missing numbers Make links to known facts.		
Multiplication	
Year 3	• Recall and use multiplication facts for the 3, 4 and 8 multiplication tables. • Write and calculate mathematical statements for multiplication using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods. • Solve problems, including missing number problems, involving multiplication, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects.
Progression of Skills	**Key Representations**
The 3 times-table Encourage daily counting in multiples both forwards and back.	… groups of 3 = … × 3 = 3, … times = 3 × … = 
… times is equal to …



<table>
<tr>
<td>The 4 times-table
Encourage daily counting in multiples both forwards and back. Encourage children to notice links between the 2 and 4 times-tables.</td>
<td>... groups of 4 =
... × 4 =
4, ... times =
4 × ... =
</td>
<td>... times is equal to ...
</td>
</tr>
<tr>
<td>The 8 times-table
Encourage daily counting in multiples both forwards and back. Encourage children to notice links between the 2, 4 and 8 times-tables.</td>
<td>... lots of 8 =
× 8 =
8, ... times =
8 × ... =
</td>
<td>... times is equal to ...
</td>
</tr>
<tr>
<td>Related facts
Use knowledge of multiplying by 10 to scale times-table facts.</td>
<td colspan="2">... × ... ones is equal to ... ones
so ... × ... tens is equal to ... tens.
</td>
</tr>
</table>

<table>
<tr>
<td>Multiply a 2-digit number by a 1-digit number - no exchange
Children apply their understanding of partitioning to represent and solve calculations using the expanded method.</td>
<td colspan="2">… tens multiplied by … is equal to … tens.
…ones multiplied by … is equal to … ones.


</td>
</tr>
<tr>
<td>Multiply a 2-digit number by a 1-digit number - with exchange
Children apply their understanding of partitioning to represent and solve calculations using the expanded method.</td>
<td colspan="2"></td>
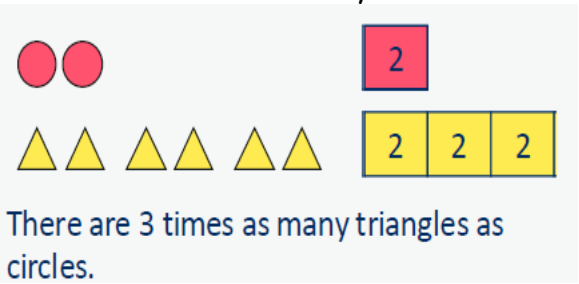
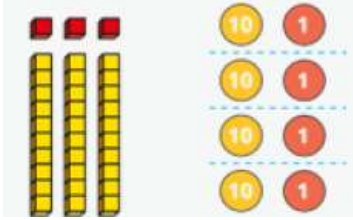
</tr>
<tr>
<td>Scaling
Children focus on multiplication as scaling (…. times the size) as opposed to repeated addition.</td>
<td>There are …. times as many … as …


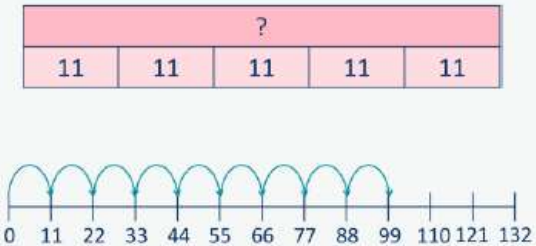
</td>
<td>… is … times the size of …
… is … times the length/height of …

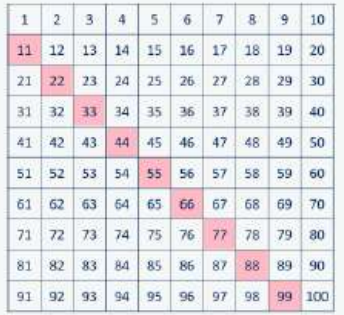
</td>
</tr>
</table>

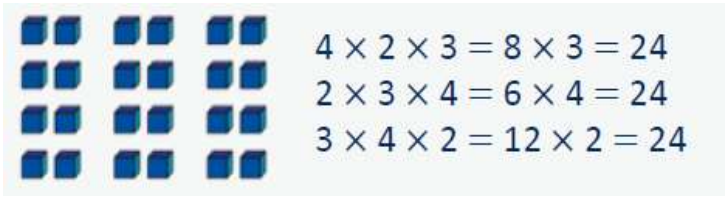
Correspondence problems (How many ways?) Encourage children to work systematically to find all the different possible combinations.	For every … , there are … possible … There are … × … possibilities altogether. 
Multiplication	
Year 4	• **Recall multiplication facts for multiplication tables up to 12 × 12** • **Use place value, known and derived facts to multiply mentally, including: multiplying by 0 and 1; multiplying together three numbers.** • **Recognise and use factor pairs and commutativity in mental calculations.** • **Multiply two-digit and three-digit numbers by a one-digit number using formal written layout.** • **Solve problems involving multiplying and adding, including using the distributive law to multiply two-digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.**
Progression of Skills	**Key Representations**

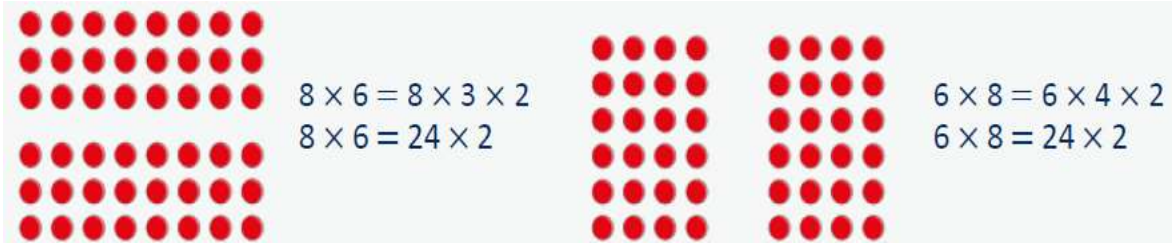
<table>
<tr>
<td>Times-table facts to 12 × 12
Encourage daily counting in multiples both forwards and back. Encourage children to notice links between related times-tables.</td>
<td colspan="2">
... groups of ... =
... times ... is equal to ...
... × ... =



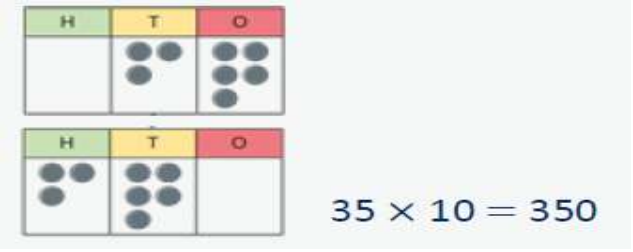


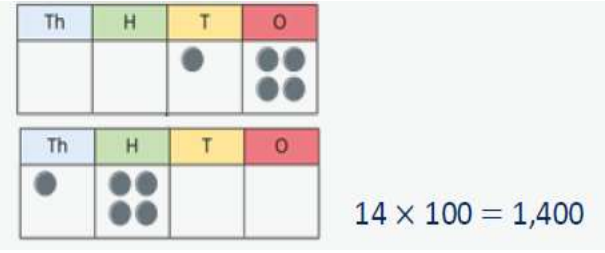


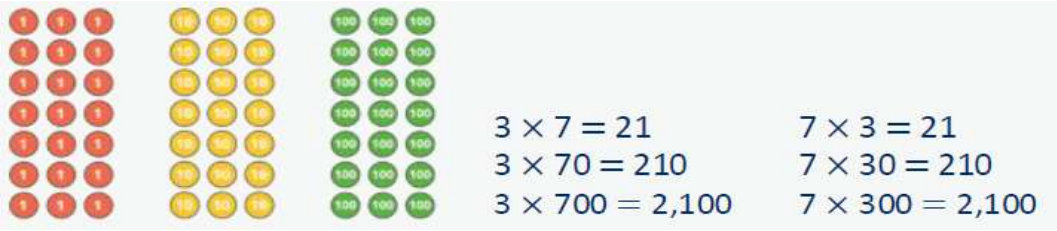
</td>
</tr>
<tr>
<td>Multiply by 1 and 0</td>
<td>Any number multiplied by 1 is equal to ...
Any number multiplied by 0 is equal to ...
</td>
<td>... × ... = ...
$1 \times 1 = 1$ $1 \times 0 = 0$
$2 \times 1 = 2$ $2 \times 0 = 0$
$3 \times 1 = 3$ $3 \times 0 = 0$
$4 \times 1 = 4$ $4 \times 0 = 0$</td>
</tr>
<tr>
<td>Multiply 3 numbers
Children use their understanding of commutativity to multiply more efficiently.</td>
<td colspan="2">To work out ... × ... × ..., I can first calculate ... × ... and then multiply the answer by ...


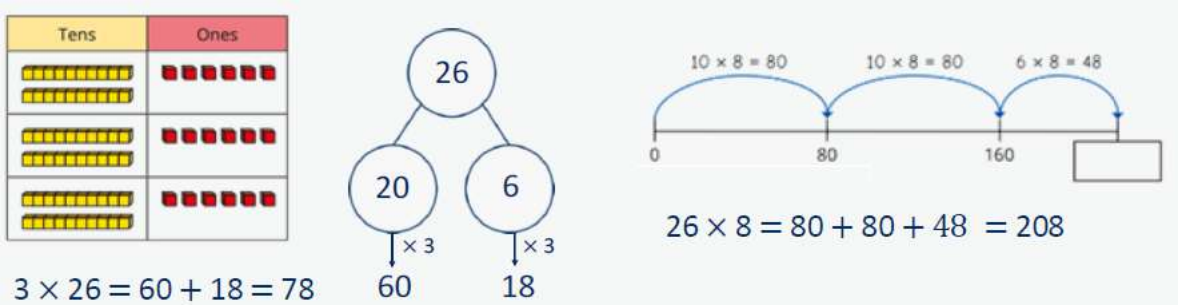
</td>
</tr>
<tr>
<td>Factor pairs
Children explore equivalent calculations using different factors pairs.</td>
<td colspan="2">12 = ... × ... , so ... × 12 = ...× ... × ...


</td>
</tr>
</table>

<table>
<tr>
<td>Multiply by 10 and 100
Some children may over-generalise that multiplying by 10 or 100 always results in adding zeros. This will cause issues later when multiplying decimals.</td>
<td>When I multiply by 10, the digits move … place value column to the left.
… is 10 times the size of …


</td>
<td>When I multiply by 100, the digits move … place value columns to the left.
… is 100 times the size of …


</td>
</tr>
<tr>
<td>Related facts
Use knowledge of multiplying by 10 and 100 to scale times-table facts.</td>
<td colspan="2">… × … ones is equal to … ones
so … × … tens is equal to … tens
and … × … hundreds is equal to … hundreds.


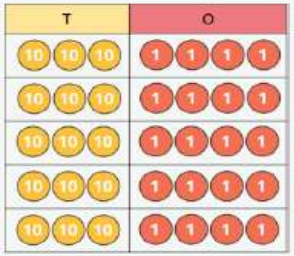
</td>
</tr>
<tr>
<td>Mental strategies
Partition 2 or 3-digit numbers to multiply using informal methods.</td>
<td colspan="2">… tens multiplied by … is equal to … tens.
…ones multiplied by … is equal to … ones.


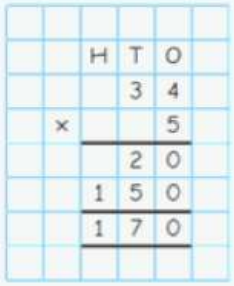
</td>
</tr>
</table>

Multiply a 2 or 3-digit number by a 1-digit number

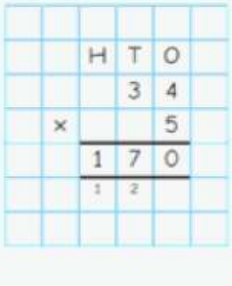
The short multiplication method is introduced for the first time, initially in an expanded form.

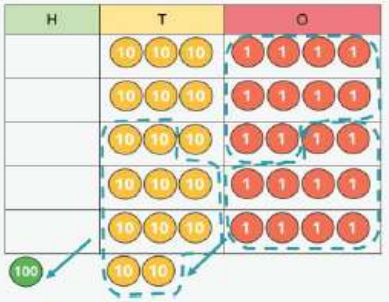
To multiply a 2-digit number by … , I multiply the ones by … and the tens by …
To multiply a 3-digit number by … , I multiply the ones by … , the tens by … and the hundreds by …





(4 × 5)
(30 × 5)

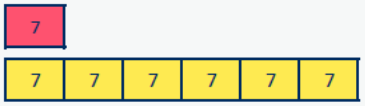




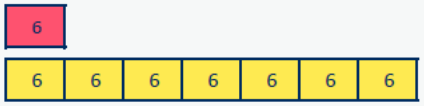
Scaling

Children focus on multiplication as scaling (… times the size).

… is … times the size of …



A computer mouse costs £7
A keyboard costs 6 times as much.



A red ribbon is 6 cm.
A yellow ribbon is 7 times as long.

Correspondence problems

Encourage children to use tables to show all the different possible combinations.

For every … , there are … possibilities.
There are … × … possibilities altogether.

A pizza company offers a choice of 5 toppings and 3 bases.

$5 \times 3 = 15$

	Deep pan	Italian	Thin
Cheese	C DP	C I	C Th
Mushroom	M DP	M I	M Th
Vegetable	V DP	V I	V Th
Chicken	C DP	C I	C Th
Tuna	T DP	T I	T Th

Multiplication	
Year 5	• Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers • Recognise and use square numbers and cube numbers, and the notation for squared (^{2}) and cubed (^{3}) • Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers. • Multiply numbers mentally drawing upon known facts. • Multiply whole numbers and those involving decimals by 10, 100 and 1000 • Multiply proper fractions
Progression of Skills	**Key Representations**
Multiples and factors Encourage children to notice patterns and make links with known facts.	  Square and cube numbers	 
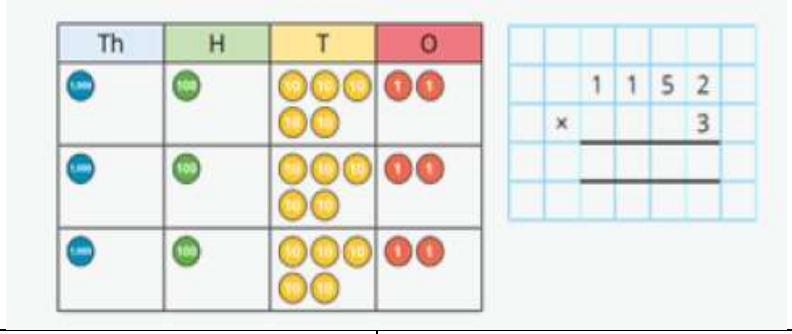
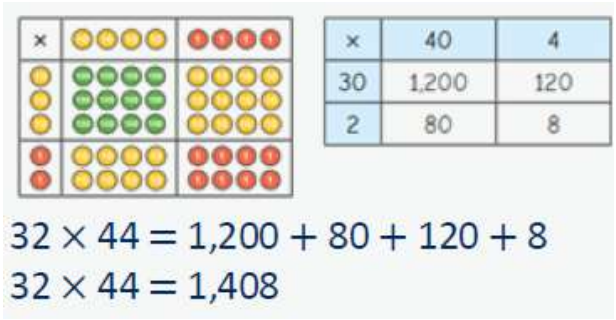
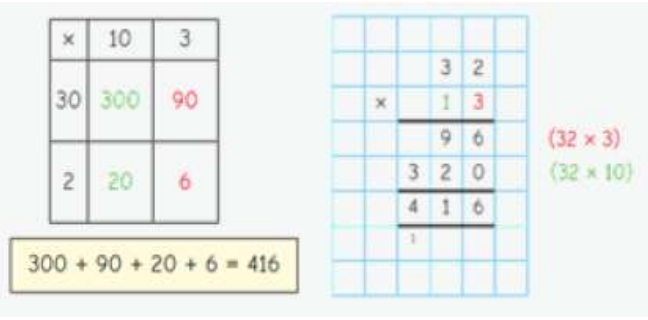
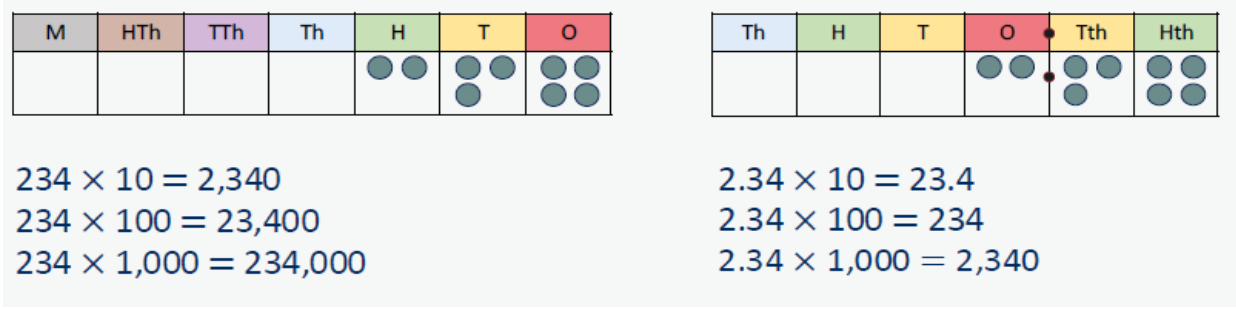
<table>
<tr>
<td>Multiply numbers up to 4 digits by a 1-digit number
This builds on the short multiplication method introduced in Y4</td>
<td colspan="2">To multiply a 4-digit number by … , I multiply the ones by … , the tens by … , the hundreds by … and the thousands by …


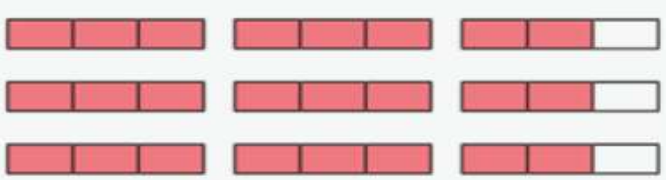
</td>
</tr>
<tr>
<td>Multiply numbers up to 4 digits by a 2-digit number</td>
<td>I can partition … into … and …


</td>
<td>First, I multiply by the … Then I multiply by the..


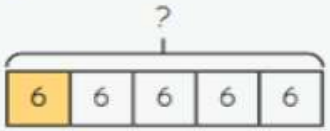
</td>
</tr>
<tr>
<td>Multiply by 10, 100 and 1,000
Some children may overgeneralise that multiplying by a power of 10 always results in adding zeros. This will cause issues later when multiplying decimals.</td>
<td colspan="2">To multiply by 10/100/1,000, I move all the digits … places to the left.
… is 10/100/1,000 times the size of …


</td>
</tr>
</table>

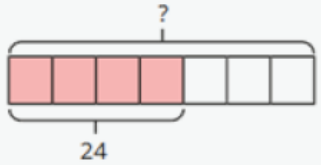
Mental strategies Children continue to use efficient mental strategies such as partitioning and knowledge of factor pairs and related facts to multiply.	… × … ones is equal to … ones so … × … tens is equal to … tens and … × … hundreds is equal to … hundreds.  $3 \times 7 = 21$ $3 \times 70 = 210$ $3 \times 700 = 2{,}100$ $7 \times 3 = 21$ $7 \times 30 = 210$ $7 \times 300 = 2{,}100$
Mental strategies Partition 2 or 3-digit numbers to multiply using informal methods.	The most efficient strategy to calculate … × … is … To calculate … × 12, I can do … × … × … For example: 121×12 I could calculate 100×12 plus 20×12 plus 1×12 I could calculate 121×10 plus 121×2 I could calculate $121 \times 6 \times 2$ I could calculate $121 \times 4 \times 3$
Multiply fractions by a whole number Make links with repeated addition.	To multiply a fraction by an integer, I multiply the numerator by the integer and the denominator remains the same.  $\frac{1}{7} \times 5 = \frac{1}{7} + \frac{1}{7} + \frac{1}{7} + \frac{1}{7} + \frac{1}{7} = \frac{5}{7}$ $\frac{2}{7} \times 3 = \frac{2}{7} + \frac{2}{7} + \frac{2}{7} = \frac{6}{7}$ $\frac{1}{5} \times 6 = \frac{6}{5} = 1\frac{1}{5}$ $\frac{2}{5} \times 3 = \frac{6}{5} = 1\frac{1}{5}$

<table>
<tr>
<td>Multiply mixed numbers by a whole number</td>
<td>I can partition $\square\frac{\square}{\square}$ into $\square$ and $\frac{\square}{\square}$


$2\frac{2}{3}\times 3$
$2\times 3=6$ $\quad \frac{2}{3}\times 3=\frac{6}{3}=2$
$2\frac{2}{3}\times 3=6+2=8$</td>
</tr>
<tr>
<td>Find the whole
Children multiply to find the whole from a given part.</td>
<td>If $\frac{1}{\square}$ is … , then the whole is … × …
$\frac{1}{5}$ of ___ = 6



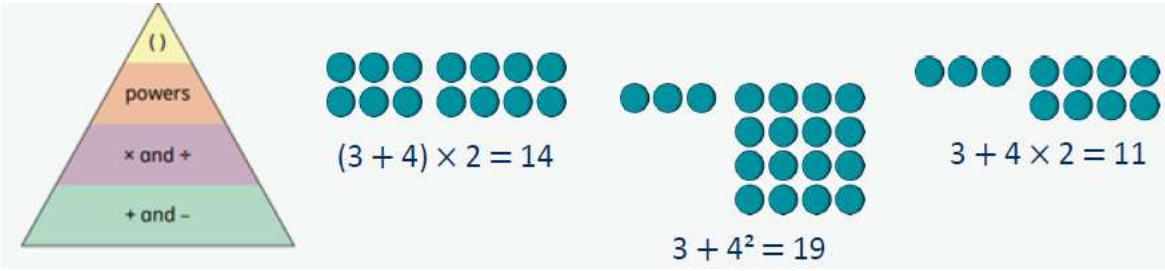
$5\times 6=30$
$\frac{1}{5}$ of 30 = 6</td>
<td>If $\frac{\square}{\square}$ is … , then $\frac{1}{\square}$ is … and the whole is … × …
$\frac{4}{7}$ of ___ = 24



$\frac{1}{7}=24\div 4=6$
$7\times 6=42$
$\frac{4}{7}$ of 42 = 24</td>
</tr>
</table>

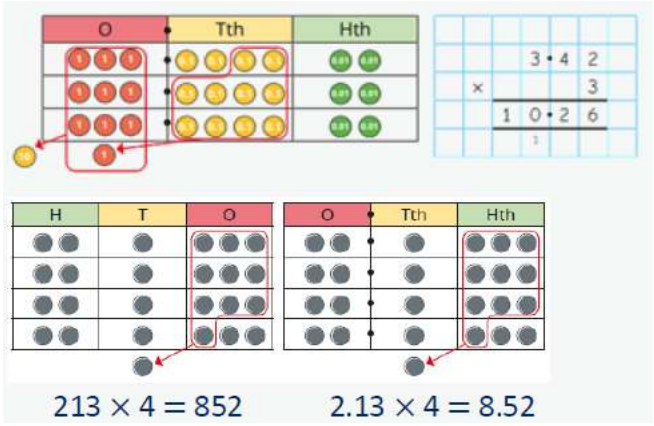
Multiplication	
Year 6	• Identify common factors and common multiples. • Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication. • Multiply numbers by 10, 100 and 1,00 • Multiply one-digit numbers with up to two decimal places by whole numbers. • Use their knowledge of the order of operations to carry out calculations involving the 4 operations. • Multiply simple pairs of proper fractions, writing the answer in its simplest form. • Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts. • Solve problems involving the calculation of percentages.
Progression of Skills	**Key Representations**
Multiply numbers up to 4 digits by a 2-digit number	To multiply by a 2-digit number, first multiply by the ones, then multiply by the tens and then find the total. 
<table>
<tr>
<td>Multiply by 10, 100 and 1,000
Some children may over-generalise that multiplying by a power of 10 always results in adding zeros.</td>
<td>To multiply by 10/100/1,000, I move all the digits … places to the left.
… is 10/100/1,000 times the size of …

$234 \times 10 = 2{,}340$
$234 \times 100 = 23{,}400$
$234 \times 1{,}000 = 234{,}000$
$0.234 \times 10 = 2.34$
$0.234 \times 100 = 23.4$
$0.234 \times 1{,}000 = 234$</td>
</tr>
<tr>
<td>Order of operations
Calculations in brackets should be done first.
Multiplication and division should be performed before addition and subtraction.</td>
<td>… has greater priority than …, so the first part of the calculation I need to do is …

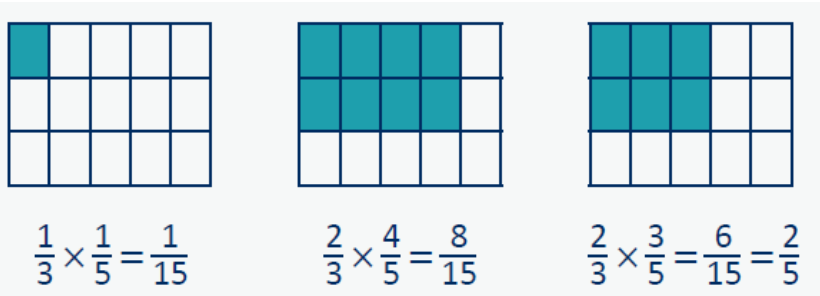


$(3 + 4) \times 2 = 14$
$3 + 4^2 = 19$
$3 + 4 \times 2 = 11$</td>
</tr>
<tr>
<td>Multiply decimals by integers
This is the first time children multiply decimals by numbers other than 10, 100 or 1,000
Encourage them to make links with known facts and whole number multiplication.</td>
<td>I know that …× …= …,
so I also know that …× … = …

$6 \times 2 = 12$
$6 \times 0.2 = 1.2$</td>
<td>I need to exchange 10 … for 1 …



$213 \times 4 = 852$
$2.13 \times 4 = 8.52$</td>
</tr>
</table>

<table>
<tr>
<td>Multiply fractions by fractions
Encourage children to give answers in their simplest form.</td>
<td colspan="2">When multiplying a pair of fractions, I need to multiply the numerator and multiply the denominator.


</td>
</tr>
<tr>
<td>Find the whole
Children multiply to find the whole from a given part.</td>
<td></td>
<td></td>
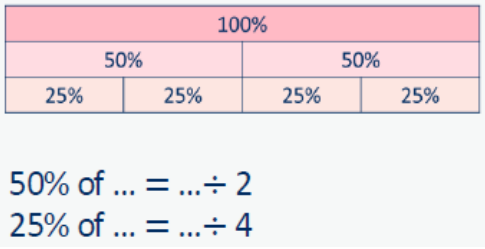
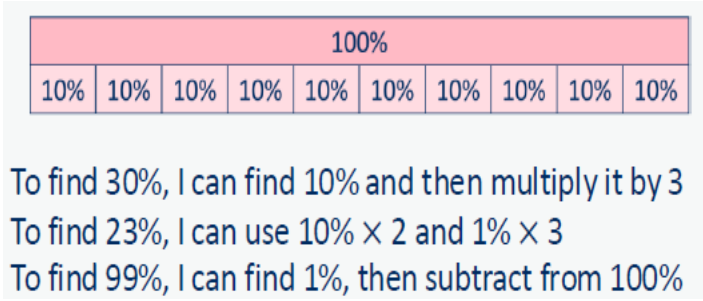
</tr>
<tr>
<td>Calculate percentages
Children first learn how to find 1%, 10%, 20%, 25% and 50% before using multiples of these amounts to find any percentage.</td>
<td>There are … lots of … % in 100%
To find … %, I need to divide by …


</td>
<td>… % is made up of … %, and … %


</td>
</tr>
</table>

Calculations involving ratio Encourage children to see the multiplicative relationship between ratios. They will need to multiply or divide each value by the same number to keep the ratio equivalent. Double number lines and ratio tables help children to see both horizontal and vertical multiplicative relationships.	For every … , there are … 
Progression of skills – Division

Year Group	Skills
Nursery	• Continue with counting and subitising skills as a foundation for later work on equal groups. (see addition and subtraction sections)
Reception	• Sharing • Grouping
Year 1	• Make equal groups – grouping • Make equal groups – sharing • Find a half • Find a quarter
Year 2	• Divide by 2 • Divide by 10 • Divide by 5 • Missing numbers • Unit fractions • Non-unit fractions
Year 3	• Divide by 3 • Divide by 4 • Divide by 8 • Related facts • Divide a 2-digit number by a 1-digit number - no exchange • Divide a 2-digit number by a 1-digit number - with remainders

	• Unit fractions of a set of objects • Non-unit fractions of a set of objects
Year 4	• Division facts to 12 × 12 • Divide a number by 1 and itself • Related facts • Divide a 2 or 3-digit number by a 1-digit number • Divide by 10 and 100
Year 5	• Mental strategies • Divide numbers up to 4 digits by a 1-digit number • Divide by 10, 100 and 1,000 • Fraction of an amount
Year 6	• Short division • Mental strategies • Long division • Order of operations • Divide by 10, 100 and 1,000 • Divide decimals by integers • Decimal and fraction equivalents • Divide a fraction by an integer • Fraction of an amount • Calculate percentages • Calculations involving ratio

Division	
Reception	• Have a deep understanding of number to 10, including the composition of each number. • Subitise (recognise quantities without counting) up to 5 • Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 and some number bonds to 10, including double facts. • Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.
Progression of Skills	**Key Representations**
Sharing Provide practical activities such as sharing items during snack time. Encourage children to check whether items have been shared fairly (equally).	There are … altogether They are shared equally between … groups. 
Grouping Provide opportunities to make equal groups when tidying up or during snack time. Encourage children to check that each group has the same amount.	There are … groups of … There are … altogether. 
Division			
Year 1	• **Solve simple one-step problems involving division, using concrete objects, pictorial representations and arrays with the support of the teacher.** • **Recognise, find and name a half as one of two equal parts of a quantity.** • **Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.**		
Progression of Skills	**Key Representations**		
Make equal groups - grouping Encourage children to physically move objects into equal groups. They can also circle equal groups when using pictures.	There are … altogether. How many groups of … can you make? 	Circle groups of 2 There are … groups of 2 	Take … cubes. Make equal groups. 
Make equal groups – sharing Encourage children to check that the objects have been shared fairly and each group is the same.	… have been shared equally between… There are … on/in each … 	Take … cubes. Share them between … 	

Find a half Start with practical opportunities to share a quantity into 2 groups. Progress to circling half of the objects in a picture and then to finding the whole from a given half.	To find half, I need to share into 2 equal groups.  	Half of ... is ... 	If ... is half, what is the whole? Find a quarter Start with practical opportunities to share a quantity into 4 groups. Progress to using pictures or bar models to find a quarter and then to finding the whole from a given quarter.	To find a quarter, I need to share into 4 equal groups.  	A quarter of ... is ... 	If ... is one quarter, what is the whole? 
Division		
Year 2	• **Recall and use division facts for the 2, 5 and 10 multiplication tables.** • **Calculate mathematical statements for division within the multiplication tables and write them using the division (÷) and equals (=) signs.** • **Recognise, find, name and write fractions a third, a quarter, 2 quarters and three quarters of a quantity.**	
Progression of Skills	**Key Representations**	
Divide by 2 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts and halving.	There are … equal groups of 2 … ÷ 2 = … 	… shared equally between 2 is … Half of … is … … ÷ 2 = … Divide by 10 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are … equal groups of 10 	… shared equally between 10 is … 
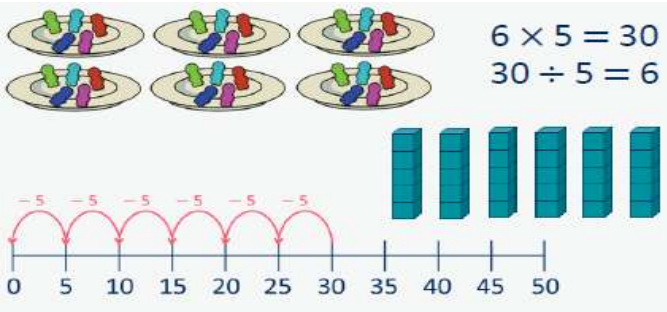
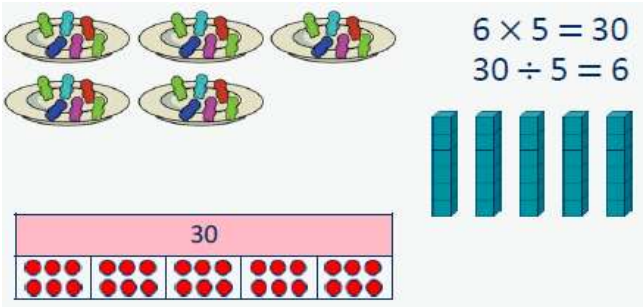
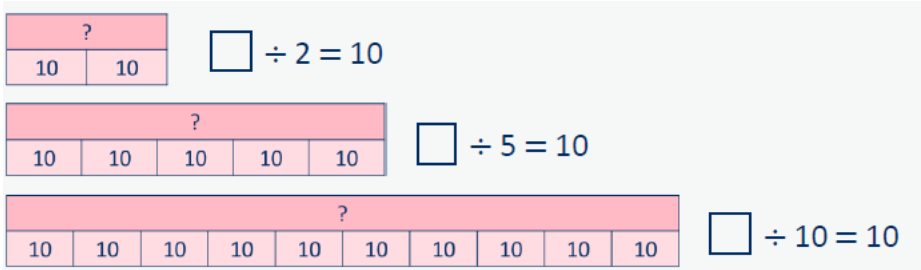
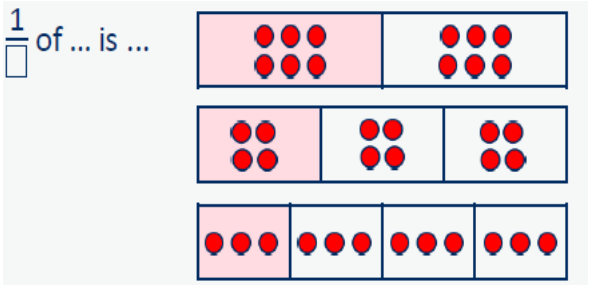
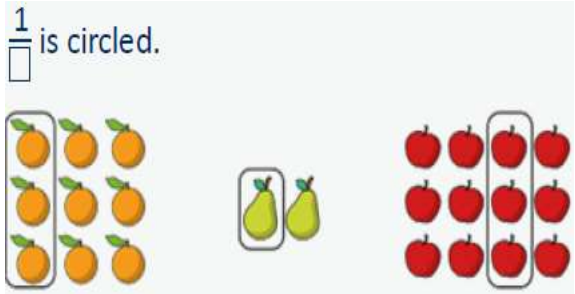
<table>
<tr>
<td>Divide by 5
Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.</td>
<td>There are … equal groups of 5
… ÷ 5 = …


</td>
<td>… shared equally between 5 is …
… ÷ 5 = …


</td>
</tr>
<tr>
<td>Missing numbers
Bar models are useful to show the link between multiplication and division.</td>
<td colspan="2">… divided by 2/ /10 is equal to …


</td>
</tr>
<tr>
<td>Unit fractions
In Y2 the focus is on finding a half, a quarter and a third. Bar models are useful to show the link between division and finding a fraction.</td>
<td>The objects have been shared fairly into … groups.


</td>
<td>There are … equal parts.
There is … part circled.


</td>
</tr>
</table>

Non-unit fractions In Y2, the focus is on finding 2 quarters and 3 quarters. Prompt children to notice that 2 quarters is equivalent to a half	The objects have been shared fairly into … groups. 	There are … equal parts. There are … parts circled. 
Division	
Year 3	• **Recall and use division facts for the 3, 4 and 8 multiplication tables.** • **Write and calculate mathematical statements for division using the multiplication tables that they know, including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods.** • **Recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators.**
Progression of Skills	**Key Representations**

Divide by 3 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are … groups of in … … ÷ 3 = 	… has been shared equally into equal groups. … ÷ 3 = Divide by 4 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are … groups of in … … ÷ 4 = 	… has been shared equally into equal groups. … ÷ 4 = Divide by 8 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are … groups of in … … ÷ 8 = 	… has been shared equally into equal groups. … ÷ 8 = 
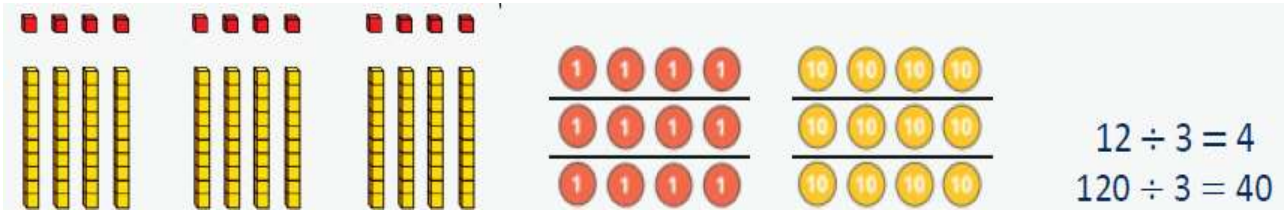
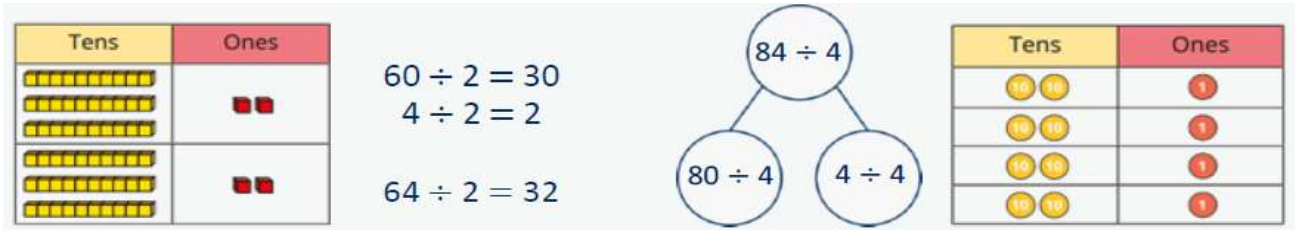
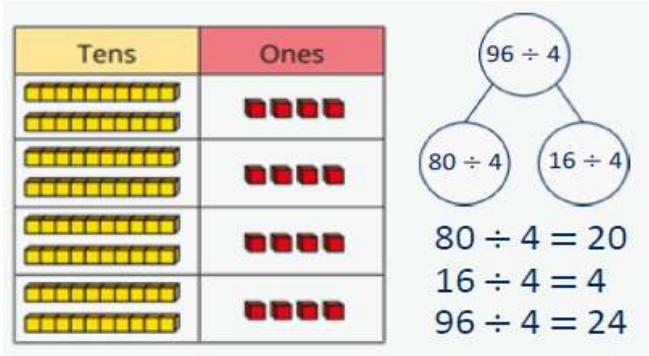
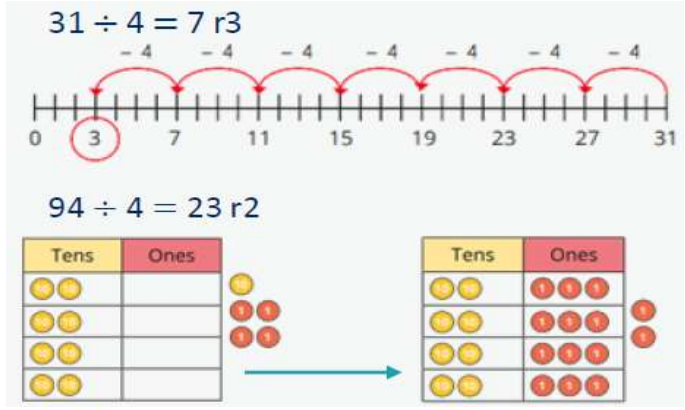
<table>
<tr>
<td>Related facts
Link to known times-table facts.</td>
<td>… ÷ … is equal to …,
so … tens ÷ … is equal to … tens.


</td>
</tr>
<tr>
<td>Divide a 2-digit number by a 1-digit number - no exchange
Partition into tens and ones to divide and then recombine.</td>
<td>… tens divided by … is equal to … tens.
… ones divided by … is equal to … ones.


</td>
</tr>
<tr>
<td>Divide a 2-digit number by a 1-digit number - with remainders
Encourage children to partition numbers flexibly to help them to divide more efficiently.</td>
<td>… tens divided by … is equal to … tens.
… ones divided by … is equal to … ones.


</td>
<td>There are … groups of …
There are … remaining.


</td>
</tr>
</table>

Unit fractions of a set of objects Bar models are useful to show the link between division and fractions, for example, dividing by 3 and finding a third.	The whole is divided into … equal parts. Each part is $\frac{1}{\square}$ of the whole.  $\frac{1}{4}$ of 12 apples is 3 apples.	One … of … is … $\frac{1}{4}$ of 12 is 3  $\frac{1}{3}$ of 36 is 12 
Non-unit fractions of a set of objects Bar models are a useful representation and show the links with division and multiplication.	The whole is divided into … equal parts. Each part is $\frac{1}{\square}$ of the whole.  $\frac{3}{4}$ of 12 apples is 9 apples.	$\frac{1}{\square}$ of … is …, so $\frac{\square}{\square}$ of … is … $\frac{3}{4}$ of 12 is 9  $\frac{2}{3}$ of 36 is 24 

Division		
Year 4	• **Recall division facts for multiplication tables up to 12 × 12** • **Use place value, known and derived facts to divide mentally, including: dividing by 1** • **Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.**	
Progression of Skills	**Key Representations**	
Division facts to 12 × 12 Encourage children to compare the grouping and sharing structures of division and to make links with times-table facts.	There are … groups of … in … … ÷ … = 	… has been shared equally into … equal groups. … ÷ … = Divide a number by 1 and itself Children may try to divide a number by zero and it should be highlighted that this is not possible.	When I divide a number by 1, the number remains the same. 	When I divide a number by itself, the answer is 1 5 shared between 5 is 1 

<table>

<tr>
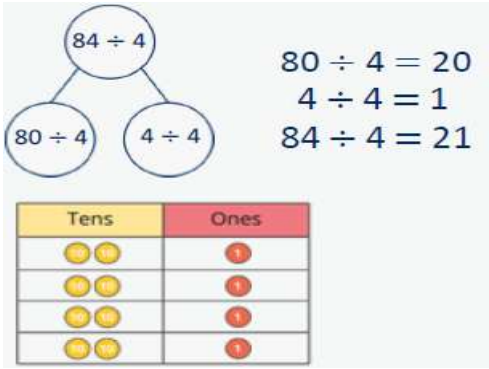
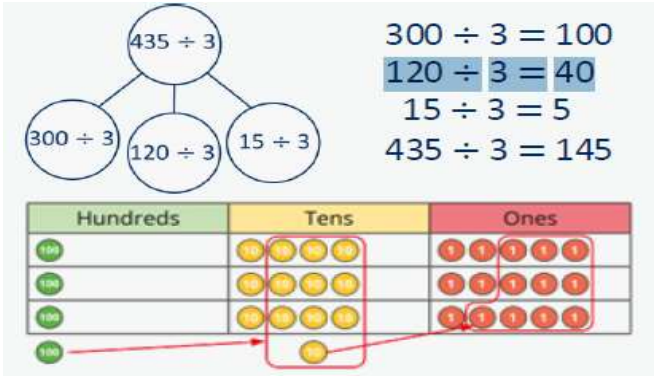
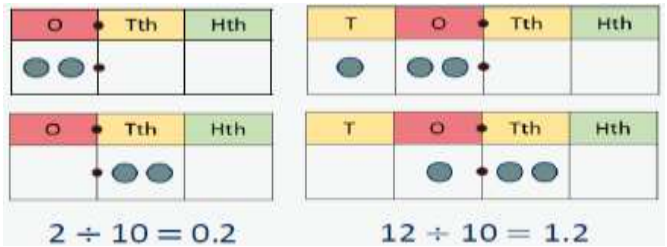
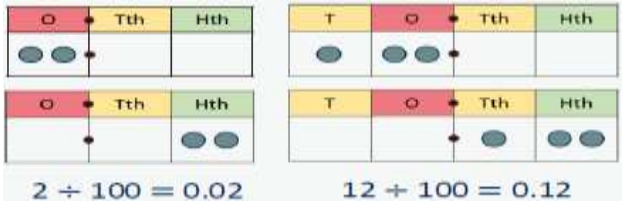
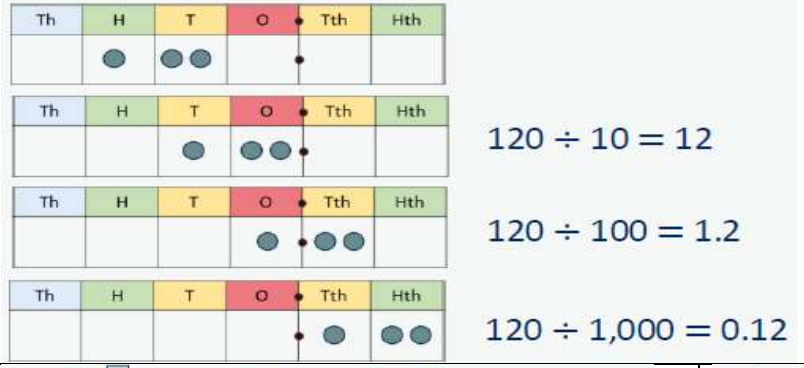
<td>Divide a 2 or 3-digit number by a 1-digit number
Progress from divisions with no exchange, to divisions with exchange and then divisions with remainders.</td>
<td>I can partition … into … tens
and … ones.


</td>
<td>I cannot share the hundreds/tens equally, so I need to exchange 1 … for 10 …


</td>
</tr>
<tr>
<td>Divide by 10 and 100
Encourage children to notice that dividing by 100 is the same as dividing by 10 twice.</td>
<td>When I divide by 10, the digits move 1 place value column to the right. … is one-tenth the size of …


</td>
<td>When I divide by 100, the digits move 2 place value columns to the right…. is one-hundredth the size of …


</td>
</tr>
</table>

Division	
Year 5	• **Divide numbers mentally drawing upon known facts.** • **Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context.** • **Divide whole numbers and those involving decimals by 10, 100 and 1,000**
Progression of Skills	**Key Representations**
Mental strategies	I can partition … into … and … to help me to divide more easily.  I can show groups of … on a number line.  To divide by …, I can divide by … and then divide the result by … $436 \div 4 = 436 \div 2 \div 2$ $436 \div 2 = 218$ $218 \div 2 = 109$
Divide numbers up to 4 digits by a 1-digit number The short division method is introduced for the first time.	There are … groups of … hundreds/tens/ones/ in … I can exchange 1 … for 10 … 
<table>
<tr>
<td>Divide by 10, 100 and 1,000
Encourage children to notice that dividing by 100 is the same as dividing by 10 twice, and that dividing by 1,000 is the same as dividing by 10 three times.</td>
<td>To divide by 10/100/1,000, I move all the digits … places to the right.
… is one-tenth/one-hundredth/one-thousandth the size of …


</td>
</tr>
<tr>
<td>Fraction of an amount
Bar models support children to understand that to find a fraction of an amount, we divide by the denominator and multiply by the numerator.</td>
<td></td>
<td></td>
</tr>
</table>

Division	
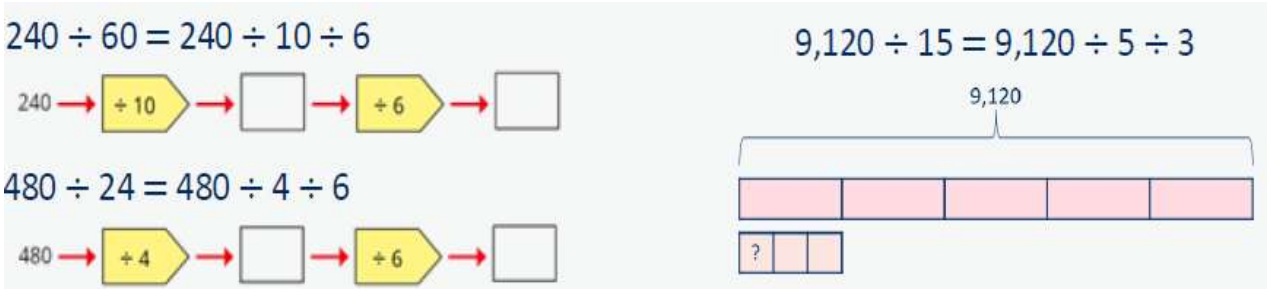
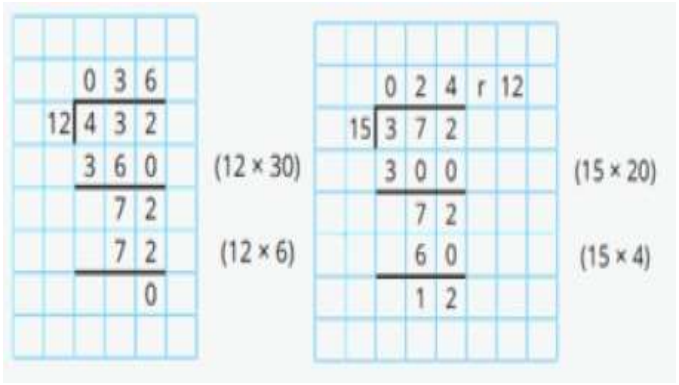
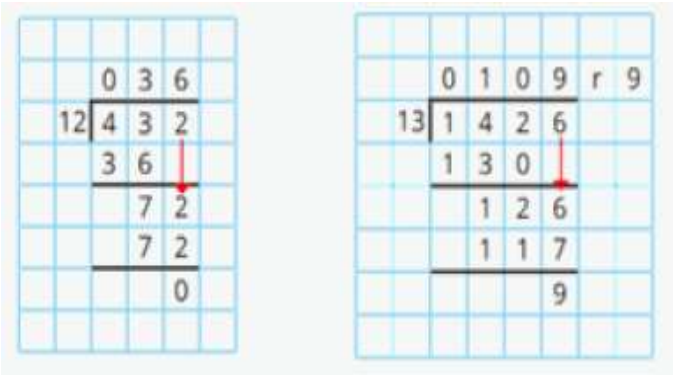
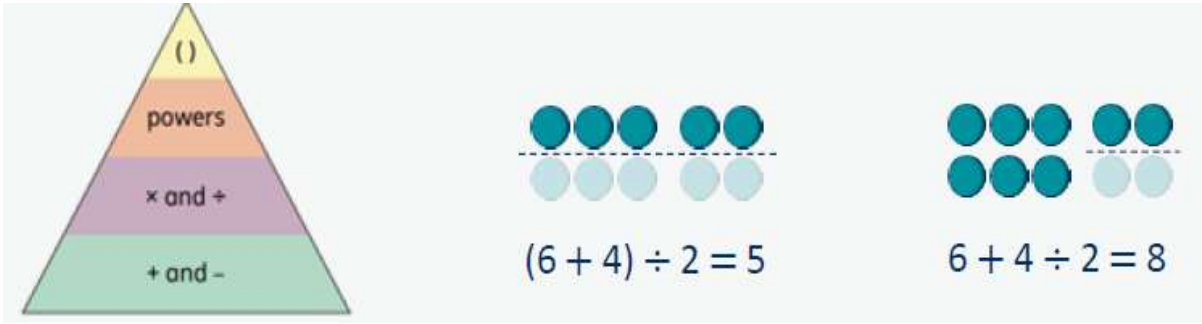
Year 6	• Perform mental calculations, including with mixed operations and large numbers. • Divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context. • Divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context. • Divide numbers by 10, 100 and 1,000 giving answers up to three decimal places. • Use written division methods in cases where the answer has up to two decimal places. • Associate a fraction with division and calculate decimal fraction equivalents. • Divide proper fractions by whole numbers • Solve problems involving the calculation of percentages.
Progression of Skills	**Key Representations**
Short division Encourage children to interpret remainders in context, for example knowing that "remainder 1" could mean complete boxes with 1 left over so 5 boxes will be needed.	There are … groups of … hundreds/tens/ones/ in … 
<table>
<tr>
<td>Mental strategies
Include partitioning and number line strategies outlined in Y5 as well as division using factors.</td>
<td colspan="2">To divide by … , I can first divide by … and then divide the answer by …


</td>
</tr>
<tr>
<td>Long division
The long division method is introduced for the first time. Two alternative methods are shown.</td>
<td>Method 1


</td>
<td>Method 2


</td>
</tr>
<tr>
<td>Order of operations
Calculations in brackets should be done first, then powers. Multiplication and division should be performed before addition and subtraction.</td>
<td colspan="2">… has greater priority than …, so the first part of the calculation I need to do is …


</td>
</tr>
</table>

Divide by 10, 100 and 1,000 Encourage children to notice that dividing by 100 is the same as dividing by 10 twice, and that dividing by 1,000 is the same as dividing by 10 three times.	To divide by … , I move the digits … places to the right.  $312 \div 10 = 31.2$ $312 \div 100 = 3.12$ $312 \div 1{,}000 = 0.312$ $906 \div 10 = 90.6$ $906 \div 100 = 9.06$ $906 \div 1{,}000 = 0.906$	
Divide decimals by integers This is the first time children divide decimals by numbers other than 10, 100 or 1,000	I know that …÷ …= …, so I also know that …÷ … = …  $39 \div 3 = 13$ $3.9 \div 3 = 1.3$ $0.39 \div 3 = 0.13$	Decimal and fraction equivalents	The fraction … is equivalent to the decimal …  $\frac{1}{5} = 0.2$ $\frac{2}{5} = 0.4$ $\frac{3}{5} = 0.6$	
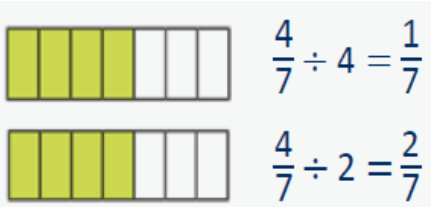
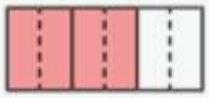
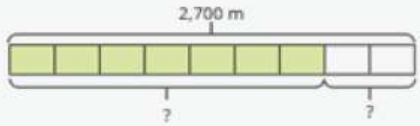
<table>
<tr>
<td>Divide a fraction by an integer
This is the first time children divide fractions by an integer.</td>
<td>… ones divided by 2 is … ones
so … sevenths divided by 2 is … sevenths.


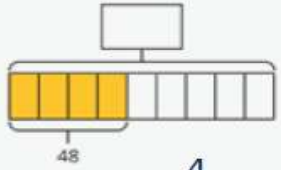
$\frac{4}{7} \div 4 = \frac{1}{7}$
$\frac{4}{7} \div 2 = \frac{2}{7}$</td>
<td>I am dividing by … , so I can split each part into … equal parts.

$\frac{1}{3} \div 2 = \frac{1}{6}$</td>
<td>… is equivalent to …
so … ÷ … = … ÷ …


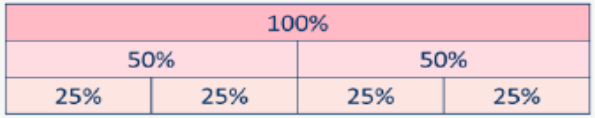
$\frac{2}{3} = \frac{4}{6}$
so $\frac{2}{3} \div 4 = \frac{4}{6} \div 4 = \frac{1}{6}$</td>
</tr>
<tr>
<td>Fraction of an amount
Children divide and multiply to find fractions of an amount. Bar models can still be used to support understanding where needed.</td>
<td>To find $\frac{1}{\square}$ I divide by …
$\frac{1}{2}$ of $36 = 36 \div 2$
$\frac{1}{12}$ of $36 = 36 \div 12$</td>
<td>If $\frac{1}{\square}$ is equal to …, then $\frac{\square}{\square}$ are equal to …



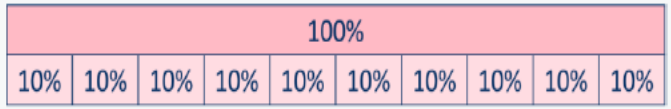
$\frac{7}{9}$ of $2{,}700 = \frac{1}{9}$ of $2{,}700 \times 7$</td>
<td>If $\frac{\square}{\square}$ is equal to …, then the whole is equal to …



$\frac{4}{9}$ of $__ = 48$</td>
</tr>
<tr>
<td>Calculate percentages
Children first learn how to find 1%, 10%, 20%, 25% and 50% before using multiples of these amounts to find any percentage.</td>
<td>There are … lots of … % in 100%
To find … %, I need to divide by …



50% of … = …÷ 2
25% of … = …÷ 4</td>
<td colspan="2">… % is made up of … %, and … %



To find 30%, I can find 10% and then multiply it by 3
To find 23%, I can use 10% × 2 and 1% × 3
To find 99%, I can find 1%, then subtract from 100%</td>
</tr>
</table>

Calculations involving ratio Encourage children to see the multiplicative relationship between ratios. They will need to multiply or divide each value by the same number to keep the ratio equivalent. Double number lines and ratio tables help children to see both horizontal and vertical multiplicative relationships.	For every … , there are … For every 6 children on a school trip, there is 1 adult. adults children The ratio of children to adults is 6 : 1 ÷ 6 ÷ 3 ÷ 3 ÷ 6 Adults / Children 1 / 6 2 / 12 3 / 18 0 1 2 3 4 5 6 Adults Children 0 6 12 18
